

Compact revolving doors Besam RD-200 series

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in
door opening solutions

Great solutions come in compact packages

The ideal solution for public buildings, hotels or office spaces.

Our entrance automation advisors support you throughout your building project.

Compact revolving doors combine the climate-control advantages of a revolving door with security and convenience.

ASSA ABLOY Entrance Systems' revolving door range now gives customers even more value for money as the innovative new features are standard equipment on all its revolving doors. The re-designed Besam three and four-wing compact revolving doors have cut the doors' energy consumption while stepping up their performance, as well as making them easier to operate on site or remotely.

- Next-generation control system
- Touchscreen mode selector
- Remote online operation
- Spotlights/downlights
- Water-resistant cover
- Emergency break-out system
- Additional safety on rotating section
- Disabled push button
- Access control in one or both directions
- Environmental product declarations are available
- Intrusion Protection package available with Night Closing Doors

Convenience

The larger diameters in the three and four-wing compact revolving door range are ideal for people carrying luggage, for example, at a hotel entrance. The smaller diameters are suitable for moderate pedestrian traffic.

Safety

All ASSA ABLOY Entrance Systems revolving doors are equipped with a full range of motion detectors and sensors as standard, making personal safety a priority. As an option, customers can add an emergency break-out system that creates a clear, unimpeded evacuation path through the door in case of an emergency.

Add an emergency break-out system to create a clear, unimpeded evacuation path through the door in case of an emergency.

Adding a touch of class

Operating modes to user statistics at your fingertips.

Access your three and four-wing compact revolving door via a secure Internet connection.

Cleaner lines due to new cladding technology. Multiple profiles and colors to choose from.

"A variety of ceilings and lighting configurations can be incorporated into the revolving door."

Cutting-edge features

The touchscreen mode selector is part of the standard offer and performs as beautifully as it looks. This sleek touch-screen control panel provides a user-friendly, graphical overview of your door's configuration, and is not just the perfect partner for the control system, but also an attractive complement to your revolving door.

With the touchscreen mode selector, you can access usage statistics, check the door's service status and even perform a range of diagnostic functions depending on access rights and user level.

The beauty within

The control system is the next-generation drive unit for Besam revolving doors, and it's nothing less than state-of-the-art. Together with the full range of monitored sensors that are standard in our doors, it provides smooth operation that is fully optimized for efficiency and personal safety.

E-functionality

Revolving doors have always been convenient for building visitors. Now, with the introduction of e-functionality, they can be just as convenient for those in charge of overseeing them.

Thanks to cutting-edge technology in the control system, you can configure and operate your door at a distance via our web interface as if on site using the touchscreen mode selector.

Beautiful aesthetics

- Superior cladding technology for beautiful clean lines, a great choice of finishes and glass, as well as ceilings and lighting configurations, to match any building.

Sustainability

- Environmental product declaration (EPD) available. Multiple compartments and sealing ensure minimal air exchange and optimum energy-savings

Cutting-edge

- Improved performance and operation with the next-generation control system, eFunctionality and touchscreen mode selector.

ASSA ABLOY Entrance Systems is a leading supplier of entrance automation solutions for efficient flow of goods and people.
